Beachvolley Assist

Mission

The idea is to have a mobile app for supporting beachvolleyball referees or scoring assistents.

The app should guide through administative tasks

like conducing the toss to decide upon the first service and the sides of the court …

Support the game

current score line, service order, time-out‘s and so on

Group 36 – Rene Gau, Manuel Haid, Blaz Kolar

Beachvolley Assist

General requirements

The app should be **intuitively** and also **usable for non experienced referees**. Helping the users **step by step** with **only minimal required input** and using **graphic and acoustic support**.

By **default** the app should **comply with the official regulations**.
